

## Auditioning Tips & FAQs

- Knowledge of the music and the show demonstrates to us who is prepared and makes a huge impression.
- Memorization is not required, but you will feel more confident if you are very familiar with the material. Always bring your sides with you just in case, but if you don't have to totally rely on them,
- Work on projecting loudly and articulating clearly.
- We are looking to see you act a character through song and dance, as well as your musical proficiency and competency. Just as (or MORE) important as a pretty voice is the way you act out your material.
- It's very, very important that you make bold, exciting choices and give the character a strong personality - that is much more important to us than having you sing or act perfectly! We can sometimes change the key of the song for the right actor. And it's our job to direct you to make you even better. But we do want to see you give it all you've got!
- Be familiar with the style of the show and make clear choices.
- Break a leg everyone! We're rooting for you!
